CHARLOTTE
TRANSPORTATION

CHARLOTTE 2014 TRANSPORTATION SURVEY

The *2014 Transportation Survey* is a statistically valid household opinion survey regarding transportation-related issues in Charlotte that is completed every two years as recommended in the City's Transportation Action Plan *Policy 4.1.4.*

The survey was conducted from June of 2014 and includes responses from 404 randomly selected households within Charlotte and its ETJ, using both landline and wireless phone numbers. This survey was conducted by The Jackson Group of Hickory, NC. Questions cover a variety of topics including residents' opinions about:

- Existing driving conditions
- Possible solutions to congestion
- Priorities for public sector actions
- Centers, Corridors and Wedges
- Pedestrian and bicycle travel
- Funding options for road construction and maintenance
- Air quality
- Speeding and safety

TAP Policy 4.1.4

The City will continue to implement a biennial survey to determine baseline public awareness and knowledge of the strategies recommended in the TAP, including the Centers, Corridors and Wedges Growth Frame-work and the City's multimodal transportation approach.

INFORMATION ABOUT THE REPORT

On the following pages you will find 1) a map illustrating the ZIP codes used to define the crosstabs provided for "Inside Route 4" and "Outside Route 4," and 2) the data for the entire survey.

Additionally, the Charlotte Department of Transportation has prepared a graphical summary of all questions in the survey as a supplement to the report. It can be found on CDOT's webpage (http://cdot.charmeck.org).
