A NEWSLETTER ABOUT THE WT HARRIS/PLOTT ROAD WATER MAIN PROJECT

WT Harris/Plott Road Water Main Project

Charlotte Water and its contractors continue to make progress on water main improvements in the area. Once completed, the project will maintain quality and reliability of water service for customers in the area.

Residents and businesses along the alignment will see varying levels of construction. Please note, schedules are subject to change due to weather and other conditions.

Construction Activities to Expect

Clearing – Crews will clear trees, bushes and shrubs along the easements following the alignment.

Moving equipment on site – Crews will move construction equipment and materials to easements along the project site throughout construction.

Pipe delivery and storage – Pipe is delivered and stored within the construction easements.

Establishing a safe work zone – Fencing will be installed around work areas and pipe will be stabilized.

Construction traffic – Dump trucks will travel along the alignment, within the easements and roadway.

Trench digging, placing pipe and backfilling

Road closures and detours around work – Rolling lane closures along Plott Road are ongoing. Motorists should follow all traffic control signs.

Planned water outages – Customers will be notified in advance of any planned water outages. Construction may cause temporary cloudy, discolored water, or lower than usual pressure. If you experience this, please run cold water for up to 15 minutes. If water doesn't clear, please call 311 and say/select "water emergency" for assistance.
