

ECONOMIC INDICATORS

CITY OF CHARLOTTE
OFFICE OF STRATEGY AND BUDGET

August 7, 2019

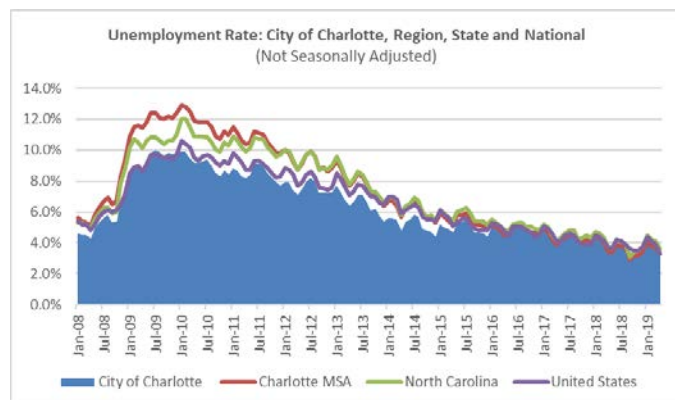

About the Report and Highlights

This report provides latest economic data on the national, state and the Charlotte region (Charlotte Metropolitan Statistical Area). Economic indicators presented include; unemployment, employment, housing and residential construction, sales tax revenues, consumer and small business confidence, real gross domestic product, and consumer price index. Some key highlights of the report include:

- The city of Charlotte's unemployment rate in June 2019 was 4.2 percent
- The Charlotte MSA nonfarm employment grew in June 2019 by 2.5 percent which represents about 49 percent of the state total job growth over the previous 12 months
- City of Charlotte's average home sales price increased by 9.4 percent and number of homes sold fell by 8.8 percent in June 2019 compared to June 2018
- Number of housing units permitted in the city of Charlotte increased by 54 percent between 2017 and 2018 increasing from 8,356 units permitted to 12,828 housing units permitted
- General Fund Sales tax revenue grew by six percent in the first ten months of FY 2019 compared to the same time period in FY 2018
- Consumer confidence and small business optimism are all high compared to historical standards and have rebounded following the softening we saw over the past few months
- Between 2016 and 2017, Charlotte MSA GDP grew by 3.5 percent; a growth rate higher than that of the nation's which grew at 2.2 percent and about one and half times that of the state of North Carolina which stood at 2.3 percent over the same period
- Compared to June 2018, consumer price index increased by 1.6 percent in June 2019, not seasonally adjusted. The energy component of the index fell by 3.4 percent

Unemployment

The City of Charlotte's unemployment rate (not seasonally adjusted) stood at 4.2 percent in June 2019, increasing by 20 basis points from 4.0 percent in June 2018. The chart on the right shows month-over-month unemployment rate, not seasonally adjusted. Charlotte region's unemployment rate stood at 4.1 percent, a rate slightly lower than that of the City. The national

Source: Bureau of Labor Statistics and North Carolina Department of Commerce
June 2019 numbers are preliminary estimates and subject to revision

unemployment rate was 3.8 percent, down from 4.2 percent in June 2018. Charlotte region's unemployment rate continues to be lower than the state and was slightly higher than the national's in June 2019.

With a relatively buoyant economy, a robust labor and housing market, people are continually moving to the Charlotte metro area looking for work.

Unemployment Rate: Charlotte Region and Comparison Areas			
	Apr-19	Apr-18	Change
Charlotte MSA	4.1%	3.9%	0.2%
Raleigh MSA	4.0%	3.7%	0.3%
Winston-Salem MSA	4.3%	4.0%	0.3%
Atlanta MSA	3.7%	4.2%	-0.5%
North Carolina	4.4%	4.2%	0.2%

29,800 jobs) to 1.24 million jobs from 1.21 million jobs in June 2018. These 29,800 additional jobs represent about 49 percent of the state's total job growth over the period.

The Charlotte MSA is adding jobs faster than the state and the nation. Employment grew by 1.5 percent at the national level, a growth rate lower than that of the Charlotte MSA which stood at 2.5 percent over the same period.

in the Government sector. The table above provides a breakdown of year-over-year job change and

In the Charlotte region, job losses were recorded

growth in select industry sectors. The Government sector employment fell by 1.1 percent losing 1,700 jobs. Construction of Buildings, Education and Health Services, and Professional and Business Services, Management of Companies and Enterprises, Leisure and Hospitality and Other Services all grew by at least three percent over the period. At the state level, the Federal Government, and Leisure and Hospitality sectors all saw growth rates above three percent between June 2018 and June 2019.

Firm Relocations and Expansions, First Quarter 2019

The Charlotte Chamber publishes the Growth Report every quarter which tracks announced openings, hiring, investments and expansions of private sector businesses in Mecklenburg County. This report captures only major gross increases in jobs; it does not account for smaller new or expanded businesses, firm closures, or workforce reductions.

In the first quarter of 2018, the Charlotte Chamber reported the addition of almost one thousand jobs by 25 projects coupled with more than \$93.6 million in capital investments in the Charlotte region.

In 2018, there was a total of 118 projects/companies adding nearly 12,000 net new jobs with capital investments totaling \$1.53 billion. The chart to the right provides a breakdown of these jobs and investment by quarter, since the second quarter of 2018.

Q1 2019		Q4 2018

Charlotte Area Housing Market

Home Sales Activity

The city of Charlotte's year-over-year home sales fell by 8.8 percent from 1,678 homes sold in June 2018 to 1,530 homes sold in June 2019. For the entire Charlotte region, that rate fell by 6.1 percent over the same period. The average sales price of homes sold in Charlotte rose by 9.4 percent in June 2019 to \$361,455 from \$330,394 the same time last year. For the Charlotte region, average sales price increased by 7.1 percent. The number of days a home stays on the market until sale increased from 29 days to 36 days in the City of Charlotte. Properties in the region stay longer in the market than in the City and the number of days has increased from 42 to 49 days. The inventory of homes available for sale decreased from 2,715 units available in June 2018 to 2,592 homes available in June 2019, a decrease of about 4.5 percent. With the low inventory challenges as seen in the city, there's more heat on home sales activity in Charlotte than the entire region as seen in its continuous lower months of supply in inventory.

Source: The Charlotte Regional Realtor Association, Local Market Update for June 2019

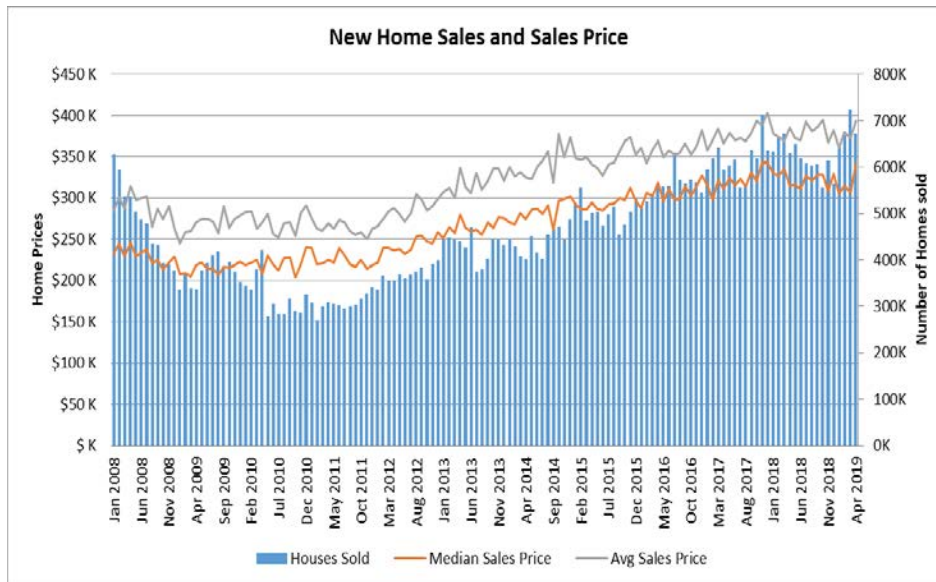

Data from the Charlotte Regional Realtor Association (CRRA) shows that in June 2019, number of homes sold declined in nine of the ten selected cities in the Charlotte region for which data is readily available compared to June 2018. Average sales price increased in all but three of the ten cities over the same period. The cities of Davidson, Huntersville, Matthews, Mooresville and Waxhaw are averaging home sale prices greater than the City of Charlotte's. See the table in the next page showing number of homes sold in these cities coupled with their average sale prices.

Select Cities Housing Activity						
City	Number of Homes Sold			Average Sale Price		
	Jun-18	Jun-19	Change	Jun-18	Jun-19	Change
Charlotte	1,678	1,530	-8.8%	\$330,394	\$361,455	+9.4%
Concord	267	208	-22.1%	\$245,886	\$273,091	+11.1%
Davidson	59	53	-10.2%	\$441,054	\$512,374	+16.2%
Gastonia	164	153	-6.7%	\$174,792	\$198,097	+13.3%
Huntersville	174	146	-16.1%	\$329,695	\$348,783	+5.8%
Matthews	125	112	-10.4%	\$335,971	\$377,013	+12.2%
Monroe	112	97	-13.4%	\$233,302	\$237,649	+1.9%
Mooresville	224	206	-8.0%	\$402,694	\$400,655	-0.5%
Statesville	88	94	+6.8%	\$199,553	\$187,333	-6.1%
Waxhaw	160	154	-3.8%	\$475,543	\$446,189	-6.2%

National Housing Market

The sales of new single-family houses in June 2019 were at a seasonally adjusted rate of 646,000 compared to 618,000 in June 2018, an increase of 4.5 percent. Compared to May 2019, the number of

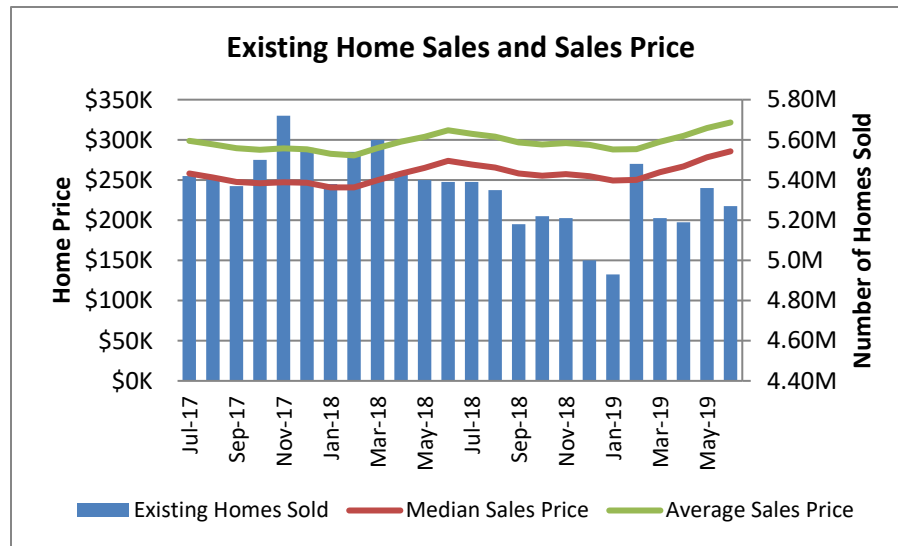

homes sold increased by seven percent. Median sales price of new homes sold remained the same at about \$310,400 in June 2019 similar to the \$310,500 price in June 2018. Average sales price fell by 0.4 percent over the same period.

The seasonally adjusted months' supply at current sales

rate (number of months) of new homes available for sale increased from 6.0 months to 6.3 months over the same period. New housing stock or inventory that's available for sale increased from 309,000 to 338,000 single-family homes over the same period. See the chart above of new home sales and sales price at the national level since January 2008.

Existing home sales fell for the fourteenth straight month in June 2019 compared to same period last year at the national level. Sales of existing homes in June 2019 were at a seasonally adjusted rate of 5.27 million homes compared

million homes compared to 5.39 million homes sold same time last year. This represents a decline in the number of existing homes sold by 2.2 percent. Low housing supply seems to be the culprit impeding sales coupled with rising prices. About 35.7 percent of people buying homes are buying homes in the price range of \$100,000 to \$250,000 and 39.4 percent of home buyers are buying

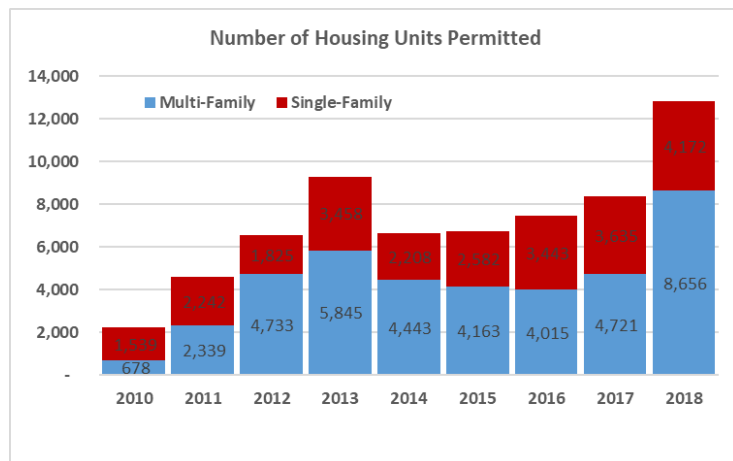

Source: National Association of Realtors (NAR)

homes in the range of \$250,000 to \$500,000.

Median existing-home sales price in June 2019 was \$285,700, which is 4.6 percent higher than the June 2018 price of \$273,800. Average existing-home sales price also increased by 3.1 percent over the same period from \$311,900 to \$321,600. Existing unsold housing inventory at the end of June 2019 stood at 1.93 million same as from a year ago. In terms of days on market until sale, properties stayed on the market for 27 days in June 2019 up from 26 days a year ago. The chart above provides a visual on existing home sales activity and sale price at the national level.

Charlotte Residential Building Permits

The adjacent chart presents building permits activity data in Charlotte since 2010. In 2018, there were 12,828 housing units permitted in the city of Charlotte. Compared to 2017 which saw 8,356 units permitted, this represents a 54 percent increase. Multi-family units permitted increased by 83 percent and for single-family; it increased by 15 percent over the period. Comparing 2011 to 2018 annual figures, building permits issued has more than doubled growing by 180 percent representing an annual growth rate of about 26 percent.

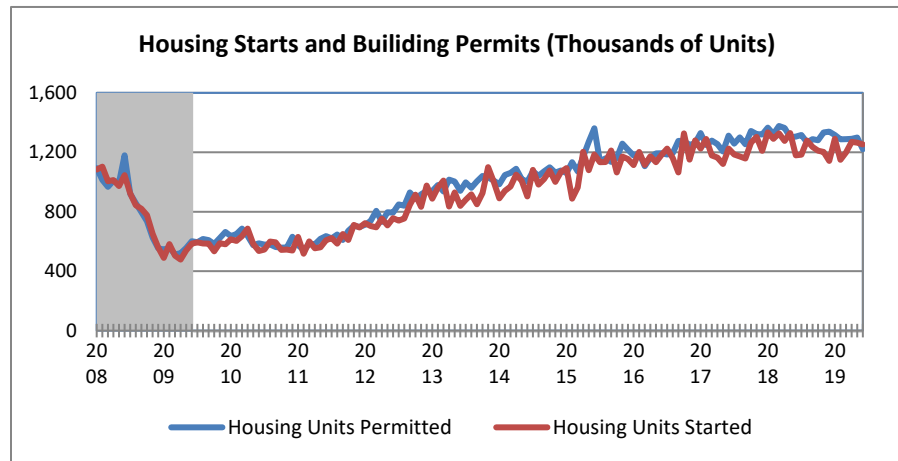

Source: Mecklenburg County's Land Use & Environmental Services Agency

National New Residential Construction

Privately-owned housing units authorized by building permits in June 2019 were at a seasonally adjusted annual rate of 1.22 million, a 6.6 percent decline compared to the June 2018 rate of 1.31 million.

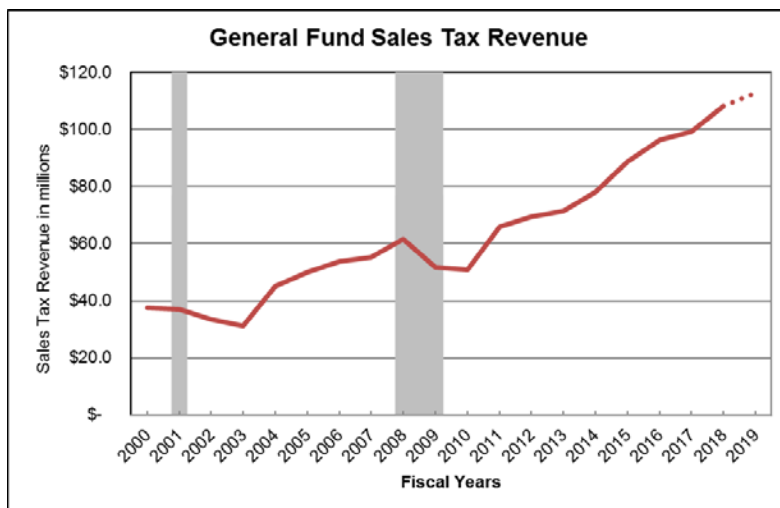

In June 2019, housing units started were at a seasonally adjusted annual rate of 1.25 million which represents a 6.2 percent increase compared to the June 2018 rate of 1.18 million. See the right chart showing housing units permitted and started since 2008. Single family housing starts were at a rate of 813,000 and for units in buildings with five units or more, the rate was 360,000. The Census Bureau defines the start of construction when excavation begins for the footings or foundation of a building.

Sales Tax Revenues

The North Carolina Department of Revenue which administers the sales tax, reports local government

Source: NC Department of Revenue, Local Government Sales & Use Tax Distribution

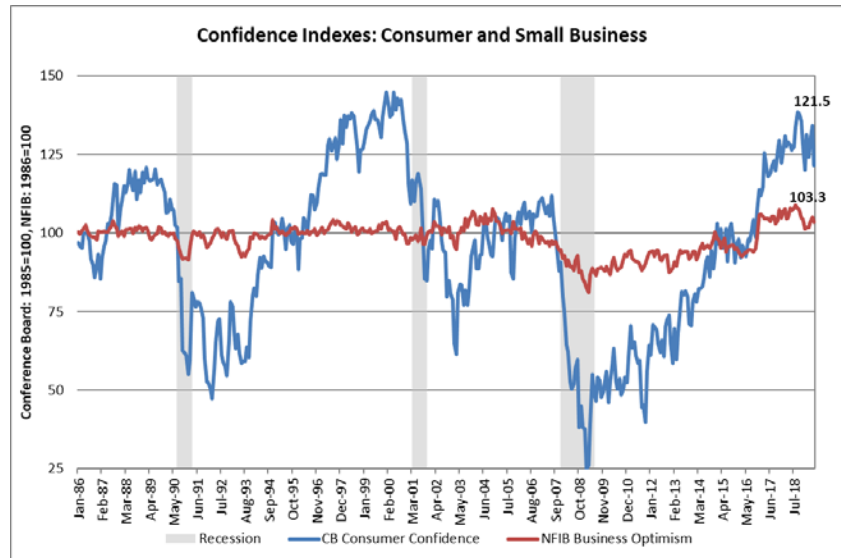

sales and use tax distributions every month typically around the 10th of each month. Between FY 2010 and FY 2017, the general fund portion of sales tax revenue almost doubled, increasing by 95 percent from \$50.8 million to \$99.3 million (see sales tax chart to the left). Comparing year over year figures, sales tax revenue for FY 2018 was \$108.1 million, increasing 8.9 percent over FY 2017. A key variable affecting the amount of sales tax distributed is sales tax refunds to nonprofit entities that

make purchases in the City. While it is hard to predict refunds as they are processed in a non-technical fashion, the economy continues to grow and revenue growth is expected to remain steady in FY 2019.

The first ten months of sales tax data for FY 2019 has been released. Comparing year-over-year actuals to date, general fund sales tax revenue grew by six percent compared to same time period in FY 2018 primarily due to relatively high sales tax refunds.

Consumer and Small Business Confidence

Consumer expectations remain relatively high by historical standards. The consumer confidence index is published by the Conference Board and measures the degree of optimism that consumers feel about the economy and their personal financial situation. The index decreased in June 2019 following an increase in May 2019. The index decreased from 134.1 in May 2019 to 121.5 in June 2019, after increasing in April. Consumers' assessment of present-day conditions declined compared to last month's and for the short-term outlook; consumers' expectations decreased based on a less optimistic view of future business conditions.

Source: The Conference Board and National Federation of Independent Business

Consumers' assessment of present-day conditions declined compared to last month's and for the short-term outlook; consumers' expectations decreased based on a less optimistic view of future business conditions.

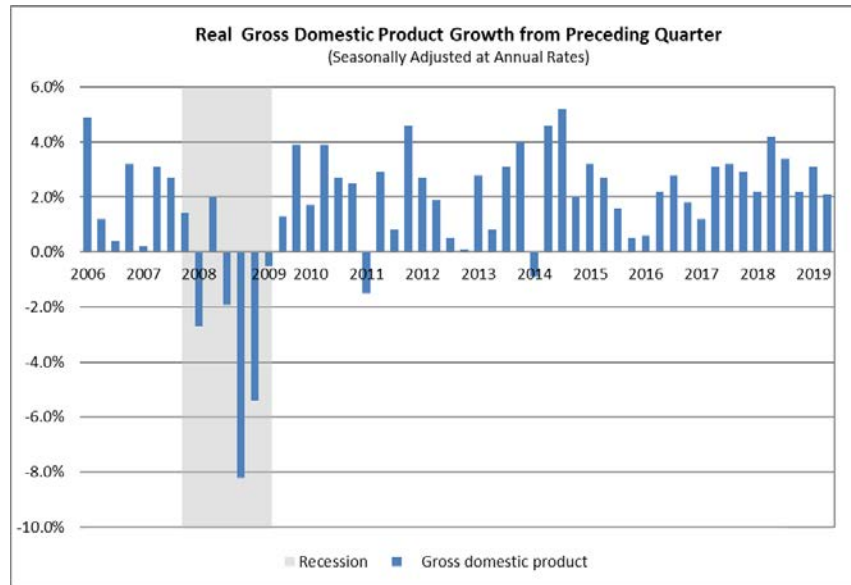

In May 2018, small business optimism reached its third-highest level ever in the index's 45-year history rising by three points to 107.8. In August 2018, the index increased to 108.8, a new record high in the survey's 45-year history, topping the July 1983 high of 108. In June 2019, the index continued its historic trend with a high value of 103.3. The index is a composite of ten seasonally adjusted components that provide an indication of the health of small businesses. Six of the components fell, three improved and one remained unchanged. The June 2019 survey report showed the uncertainty index rising substantially. Expectations for sales gains and general business environment decreased increasing business uncertainty levels. The report also showed that more business owners expecting credit conditions to tighten. The chart above shows the month-to-month fluctuations in both the consumer and small business confidences since 1986 including recession time periods.

Real Gross Domestic Product

The U.S. Bureau of Economic Analysis publishes real Gross Domestic Product (GDP) at the metropolitan statistical area (MSA) level. GDP measures the total value of all goods and services produced within a given area in a particular period of time. Real GDP by MSA is an inflation-adjusted measure of each MSA's gross product that is based on national prices for the goods and services produced within the MSA. Data for MSAs are published annually while data for the nation is published quarterly. Between 2016 and 2017, Charlotte MSA grew by 3.5 percent; a growth rate higher than that of the nation's which grew at 2.2 percent and about one and a half times that of the state of North Carolina which stood at 2.3 percent over the same period. At the state level, the gross state product grew by 2.9 percent in 2018

and forecasters from the Belk College of Business expect a growth rate of 2.8 percent over the 2018 level in 2019.

At the national level, the Bureau of Economic Analysis reported real GDP increased at an annual rate of 2.1 percent in the second quarter of 2019 according to their “advance” estimate after increasing 3.1 percent in the first quarter of 2019. The increase in real GDP was because of positive contributions from personal consumption expenditures (PCE), federal government spending, and state and local

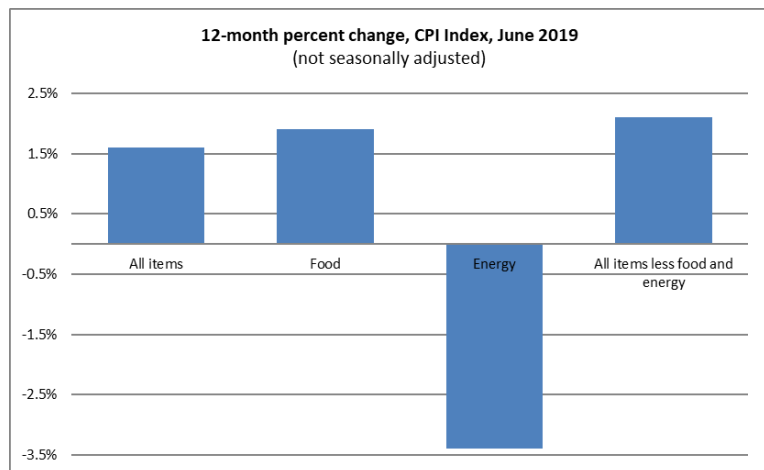

Source: U.S. Bureau of Economic Analysis

government spending, that were partly offset by negative contributions from exports, private inventory investment, nonresidential fixed investment and residential fixed investment. Imports which also help reduce GDP, increased. The acceleration in real GDP in the second quarter of 2019 was due to accelerations in PCE and federal government spending.

Consumer Price Index

The Bureau of Labor Statistics defines the Consumer Price Index (CPI) as the average change over time in prices paid by urban consumers for a market basket of consumer goods and services. The BLS publishes this data monthly on a seasonally-adjusted and not seasonally adjusted basis. In June 2019, CPI for All Urban Consumers (CPI-U) increased by 0.1 percent on a seasonally adjusted basis after rising by 0.1 percent in May 2019. Compared to June 2018, CPI-U increased by 1.6 percent not seasonally adjusted (see the CPI Index 12-month change chart). Among the

Source: US Bureau of Labor Statistics

major expenditure categories, energy fell by 3.4 percent over the 12-month period due to falling prices in energy commodities such as fuel oil and motor fuel. The food expenditure category grew by 1.9 percent and the ‘all items less food and energy’ category grew by 2.1 percent over the same period with notable increases in tobacco and smoking products, and rent of primary residence.
