I. General Provisions

- Site Description.** These development Standards and the Technical Data Sheet form the rezoning plan (hereafter collectively referred to as the "Rezoning Plan") associated with the Rezoning Petition filed by Kevin Boyd (the "Petitioner") to accommodate the adaptive reuse of the building located at 908 East 35th Street for commercial uses on the parcel of land more particularly described as Mecklenburg Tax Parcel Number 083-125-01 (the "Site").
- Intent.** This Rezoning is intended to accommodate adaptive reuse of the existing building by allowing flexibility in the parking and streetscape standards to maintain the existing character of the Site.
- Zoning Districts/Ordinance.** Development of the Site will be governed by the Rezoning Plan as well as the applicable provisions of the City of Charlotte Zoning Ordinance (the "Ordinance"). Unless the Rezoning Plan establishes more stringent standards, the regulations established under the Ordinance for the MUDD zoning classification shall govern all development taking place on the Site, subject to the Optional Provisions provided below.
- Graphics and Alterations/Modifications.** The schematic depictions of the uses, sidewalks, structures and buildings, building elevations (if provided), building materials, streetscape perspectives, driveways and other development matters and site elements set forth on the Rezoning Plan are intended to be conceptual in nature. Since the project has not undergone the design development and construction phases, it is intended that this Rezoning Plan provide flexibility in allowing some alterations or modifications from the graphic representations and renderings of the development matters and site elements. Therefore, there may be instances where minor modifications will be permitted without requiring the administrative amendment process per Section 6.207 of the Ordinance.

II. Optional Provisions

- The following optional provisions are provided to accommodate deviations from the MUDD Ordinance standards:
- To allow the existing building to remain without being required to come into conformance with architectural design standards under the MUDD zoning district. For the sake of clarity, if the existing building is demolished (other than by casualty, acts of God, etc.) and a new building is constructed on the Site, the new building(s) must conform with MUDD design standards;
 - To eliminate the parking requirement for uses contained in the existing building, potential expansion, and outdoor uses. For the sake of clarity, if the existing building is demolished (other than by casualty, acts of God, etc.) and a new building is constructed on the Site, the new building(s) must meet parking standards as required under the Ordinance;
 - To allow deviations from the typical streetscape requirements, as generally depicted on the Rezoning Plan, in coordination with CDDT; and
 - To allow deviations from the sight triangle requirements as generally depicted on the Rezoning Plan.
 - To allow the existing building to encroach into the 14' setback as generally depicted on the Rezoning Plan.
