Improved open space areas and amenities cannot be located within required buffers. h. The Petitioner reserves the right to request an Alternative Buffer approval per Section 12.304 for the portion of the Site that abuts tax parcel # 111-071-04, as this parcel is unbuildable and providing a buffer would serve no purpose. i. Trash collection from the Site will be from dumpsters or a trash compactor. 	 three elevations of the proposed building will be articulated with a water table a minimum of three (3) feet in height. f. Building elevations facing existing public street or the new private street shall not have expanses of blank walls greater than 10 feet. g. Architectural features such as, but not limited to, banding, medallions, or design features or materials will be provided to avoid a sterile, unarticulated blank treatment of such walls. h. Roof form and rooffines shall be designed to avoid the appearance of a large monolithic roof structure through the following standards: (i) Long rooffines (pitched or flat) shall avoid continuous expanses without variation by including changes in height and/or roof form (e.g. dorners, gables, etc.). (ii). For pitched roofs the allowed minimum pitch shall be 4:12 (four feet in vertical height for every twelve feet in horizontal length), excluding buildings with a flat roof and parapet walls. i. Ground mounted utility structures, such as HVAC units, shall be screened architecturally or with evergreen plant material. j. Retaining walls shall be designed to match and complement the building architecture of the residential buildings of the subject property. k. HVAC and related mechanical equipment will be screened from public view and from view of adjacent properties at grade. l. Dumpster and recycling area will be enclosed by a solid wall or fence with one side being a decorative gate. The wall or free used to enclose the dumpster will be architecturally compatible with the building materials and colors used on the principal buildings. The location of the proposed dumpster and recycling area is generally depicted on the Rezoning Plan. m. Meter banks will be screened from adjoining properties and from the abutting public streets.
 generally depicted on the Rezoning Plan. A 30-foot setback will also be provided from the full right-of-way of I-485 as generally depicted on the Rezoning Plan. b. Along the Site's frontage on Robinwood Drive a 27-foot setback will be provided. c. Along the internal public street, a 15-foot setback as measured from the public access easement as allowed by Section 9.303.19 of the Ordinance will be provided as generally depicted on the Rezoning Plan. The public access easement will follow the back of the sidewalk located on either side of the street. d. Along the Site's internal parking areas, the Petitioner will provide a sidewalk and cross-walk network that links to the building on the Site and to the sidewalk salong the abutting public streets in the manner depicted on the Rezoning Plan. The minimum width for this internal sidewalk will be five (5) feet. e. A 50-foot Class C Buffer will be provided along the property boundaries that abut single-family zoning or use. The proposed Class C buffer can be reduced with a fence or berm as allowed by the zoning regulations. f. The existing accessory structure that is part of 5100 Robinwood Dr. that encroaches on the Site may tright buffer approval per Section 12.304 for the provided are general with a fence or berm as allowed by the zoning or or may remain in its current location if it is located outside of the required buffer. g. Improved open space areas and amentities cannot be located within required buffers. h. The Petitioner reserves the right to request an Alternative Buffer approval per Section 12.304 for the portion of the Site that abut tax parcel # 111-071-04, as this parcel is unbuildable and providing a buffer would serve no purpose. i. Trash collection from the Site will be from dumpsters or a trash compactor. 5. Methods and the building materials used on the principal buildings constructed on Site will be a combination of portions of the following: brick, ston	 three elevations of the proposed building will be articulated with a water table a minimum of three (3) feet in height. f. Building elevations facing existing public street or the new private street shall not have expanses of blank walls greater than 10 feet. g. Architectural features such as, but not limited to, banding, medallions, or design features or materials will be provided to avoid a sterile, unarticulated blank treatment of such walls. h. Roof form and rooffines shall be designed to avoid the appearance of a large monolithic roof structure through the following standards: (i) Long roofines (pitched or flat) shall avoid continuous expanses without variation by including changes in height and/or roof form (e.g. donners, gables, etc.). (ii). For pitched roofs the allowed minimum pitch shall be 4:12 (four feet in vertical height for every twelve feet in horizontal length), excluding buildings with a flat roof and parapet walls. i. Ground mounted utility structures, such as HVAC units, shall be screened architecturally or with evergreen plant material. j. Retaining walls shall be designed to match and complement the building architecture of the residential buildings of the subject property. k. HVAC and related mechanical equipment will be screened from public view and from view of adjacent properties at grade. l. Dumpster and recycling area will be enclosed by a solid wall or fence with one side being a teccorative gate. The wall or fence used to enclose the dumpster will be architecturally compatible with the building materials and colors used on the principal buildings. The location of the proposed dumpster and recycling area is generally depicted on the Rezoning Plan. A minimum of 8,000 square feet of on adjoining properties and from the abutting public streets.
 generally depicted on the Rezoning Plan. A 30-foot setback will also be provided from the full right-of-way of I-485 as generally depicted on the Rezoning Plan. b. Along the Site's frontage on Robinwood Drive a 27-foot setback will be provided. c. Along the internal public street, a 15-foot setback as measured from the public access easement as allowed by Section 9.303.19 of the Ordinance will be provided as generally depicted on the Rezoning Plan. The public access easement will follow the back of the sidewalk located on either side of the street. d. Along the Site's internal parking areas, the Petitioner will provide a sidewalk and cross-walk network that links to the building on the Site and to the sidewalk located on either side of the street. e. A 50-foot Class C Buffer will be provided along the property boundaries that abut single-family zoning or use. The probled Class C buffer can be reduced with a fence or berm as allowed by the zoning regulations. f. The existing accessory structure that is part of 5100 Robinwood Dr. that encroaches on the Site may regulations. g. Improved open space areas and amenities cannot be located within required buffers. h. The Petitioner reserves the right to request an Alternative Buffer approval per Section 12.304 for the portion of the Site will be from dumpsters or a trash compactor. 5. Centeral Design Cuidelines a. The building materials used on the principal buildings constructed on Site will be a combination of portions of the following: brick, stone, precasi stone, stone, stone store store sthe right to request an Alternative Buffer approval per Section 1	 three elevations of the proposed building will be articulated with a water table a minimum of three (3) feet in height. f. Building elevations facing existing public street or the new private street shall not have expanses of blank walls greater than 10 feet. g. Architectural features such as, but not limited to, banding, medallions, or design features or materials will be provided to avoid a sterile, unarticulated blank treatment of such walls. h. Roof form and roofines shall be designed to avoid the appearance of a large monolithic roof structure through the following standards: (i). Long rooflines (pitched or flat) shall avoid continuous expanses without variation by including changes in height and/or roof form (e.g. dormers, gables, etc.). (ii). For pitched roofs the allowed minimum pitch shall be 4:12 (four feet in vertical height for every twelve feet in horizontal length), excluding buildings with a flat roof and parapet walls. i. Ground mounted utility structures, such as HVAC units, shall be screened architecturally or with evergreen plant material. j. Retaining walls shall be designed to match and complement the building architecture of the residential buildings of the subject property. k. HVAC and related mechanical equipment will be screened from public view and from view of adjacent properties at grade. l. Dumpster and recycling area will be enclosed by a solid wall or fence with one side being a decornive gate. The wall or fence used to enclose the dumpster will be architecturily compatible with the building materials and colors used on the residential publiching of the target plan. m. Meter banks will be screened from adjoining properties and from the abuting public streets. 6. Open Space and Amenity Area Improvements: a. Open space areanity depicted on the Rezoning Plan. A minimum of \$0,000 square feet of improved open space area. Additional pendscaparing, seating area
 generally depicted on the Rezoning Plan. A 30-foot setback will also be provided from the full right-of-way of 1-485 as generally depicted on the Rezoning Plan. b. Along the Site's frontage on Robinwood Drive a 27-foot setback will be provided. c. Along the internal public street, a 15-foot setback as measured from the public access easement as allowed by Section 9.303.19 of the Ordinance will be provided as generally depicted on the Rezoning Plan. The public access easement will follow the back of the sidewalk alocated on either side of the street. d. Along the Site's internal parking areas, the Petitioner will provide a sidewalk and cross-walk network that links to the building on the Site and to the sidewalks along the abuting public streets in the manner depicted on the Rezoning Plan. The minimum width for this internal sidewalk will be five (5) feet. e. A 50-foot Class C Buffer will be provided along the property boundaries that abut single-family zoning or use. The proposed Class C buffer can be reduced with a fence or berm as allowed by the zoning regulations. f. The existing accessory structure that is part of 5100 Robinwood Dr. that encroaches on the Site may tither be relocated (removed) or may remain in its current location if it is located outside of the required buffer. g. Improved open space areas and amenities cannot be located within required buffers. h. The Petitioner reserves the right to request an Alternative Buffer approval per Section 12.304 for the portions of the Site that abuts tax parcel # 111-071-04, as this parcel is unbuildable and providing a buffer would serve no purpose. i. Trash collection from the Site will be from dumpsters or a trash compactor. 5. General Design Cuidelins: a. The building materials used on the principal buildings constructed on Site will be a combination of portions of the following, brick, store, precast store, precast stone, precast stone, cementitious fiber	 three elevations of the proposed building will be articulated with a water table a minimum of three (3) feet in height. f. Building clevations facing existing public street or the new private street shall not have expanses of blank walls greater than 10 feet. g. Architectural features such as, but not limited to, bunding, medallions, or design features or materials will be provided to avoid a sterile, unarticulated blank treatment of such walls. h. Roof form and rooflines shall be designed to avoid the appearance of a large monolithic roof structure through the following standards: (i) Long rooflines (pitched or flat) shall avoid continuous expanses without variation by including changes in height and/or roof form (e.g. dormers, gables, etc.). (ii). For pitched roofs the allowed minimum pitch shall be 4:12 (four feet in vertical height for every treely refet in horizontal length), oxcluding buildings with a flat roof and parapet walls. i. Ground mounted utility structures, such as HVAC units, shall be screened architecturally or with evergreen plant material. j. Relatining walls shall be designed to match and complement the building architecture of the residential buildings of the subject property. k. HVAC and related mechanical equipment will be screened from public view and from view of adjacent properties at grade. I. Dumpster and recycling area will be checked by a solid wall or fence with one side being a decornity egat. The wall of face used to enclose the dungter well be architecturally compatible with the building materials and colors used on the Rezoning Plan. m. Meter banks will be screened from adjoining properties and from the abutting public streets. 6 Open Space and Annenity Area Improvements: a. Open space amenity areas will be provided at a location that central to the development and convenient to the future residents of the communy. The proposed open space areas will
 generally depicted on the Rezoning Plan. A 30-foot setback will also be provided from the full right-of-way of 1-485 as generally depicted on the Rezoning Plan. b. Along the Site's frontage on Robinwood Drive a 27-foot setback will be provided. c. Along the internal public street, a 15-foot setback as measured from the public access easement as allowed by Section 9.30.19 of the Ortinance will be provided as generally depicted on the Rezoning Plan. The public access easement will follow the back of the sidewalk located on either side of the street. d. Along the Site's internal parking areas, the Petitioner will provide a sidewalk and cross-walk network that links to the building on the Site and to the sidewalk along the abutting public streets in the manner depicted on the Rezoning Plan. The minimum width for this internal sidewalk will be five (3) feet. e. A 50-foot Class C Buffer will be provided along the property boundaries that abut single-family zoning or use. The proposed Class C buffer can be reduced with a fence or berm as allowed by the zoning regulations. f. The existing accessory structure that is part of 5100 Robinwood Dr. that encroaches on the Site may either be relocated (removed) or may remain in its current location if it is located outside of the required buffer. g. Improved open space areas and amenities cannot be located within required buffers. h. The Petitioner reserves the right to request an Alternative Buffer approval per Section 12.304 for the portion of the Site that abut tax parcel # 111-071-04, as this parcel is unbuildable and providing a buffer would serve no purpose. i. Trash collection from the Site will be from dumpsters or a trash compactor. 5. Method flowing: brick, stone, precast stone, precast concrete, synthetic stone, cementitious fiber board, stucce, LIPB, decordive block And/or wood. Vinyl or aluminum as a building material may only be used on windows, soffits and on handralls	 three elevations of the proposed building will be articulated with a water table a minimum of three (3) feet in height. f. Building elevations facing existing public street or the new private street shall not have expanses of blank walls greater than 10 feet. g. Architectural leatures such as, but not limited to, banding, medallions, or design features or materials will be provided to avoid a sterile, unarticulated blank treatment of such walls. h. Roof form and rooffines shall be designed to avoid the appearance of a large monolithic roof structure through the following standards: i). Long rooffines (pliched or flat) shall avoid continuous expanses without variation by including changes in height and/or roof form (e.g. dormers, galee, etc.). (ii). For piched roofs the allowed minimum pitch shall be 4:12 (four feet in vertical height for every twelve feet in horizontal length), excluding buildings with a flat roof and parapet walls. i. Ground mounted utility structures, such as HVAC units, shall be screened architecturally or with veragreen plant material. j. Retaining walls shall be designed to match and complement the building architecture of the residential buildings of the subject property. k. IHVAC and related mechanical equipment will be screened from public view and from view of adcorntive gate. The wall or frace used to enclose the dumpster will be architecturally compatible with the building materials and colours used to mechose the dumpster will be architecturally compatible with the building materials and colours used to mechose the dumpster will be architecturally compatible with the building materials and colours used to mechose the dumpster will be architecturally compatible with the building materials and colours used to mechose the dumpster will be architecturally compatible with the building materials and colours used to mechose the dumpster will be architecturally compatid be with the subjecting materials and colo
 generally depicted on the Rezoning Plan. A 30-foot sethack will also be provided from the full right-of-way of 1485 as generally depicted on the Rezoning Plan. b. Along the Site's frontage on Robinwood Drive a 27-foot sethack will be provided. c. Along the internal public street, a 15-foot sethack as measured from the public access casement as allowed by Section 9.30.19 of the Onfinance will be provided as generally depicted on the Rezoning Plan. The public access casement will follow the back of the sidewalk located on either side of the street. d. Along the Site's internal parking areas, the Petitioner will provide a sidewalk and cross-walk network that links to the building on the Site and to the sidewalk and the abutting public streets in the manner depicted on the Rezoning Plan. The minimum width for this internal sidewalk will be five (5) feet. e. A 50-foot Class C Buffer will be provided along the property boundaries that abut single-family zoning or use. The proposed Class C buffer can be reduced with a fence or berm as allowed by the zoning regulations. f. The existing accessory structure that is part of 5100 Robinwood Dr. that encroaches on the Site may either be relocated (removed) or may remain in its current location if it is located outside of the required buffer. g. Improved open space areas and amenities cannot be located within required buffers. h. Trash collection from the Site will be from dumpsters or a trash compactor. 5. General Design Guidelinez b. All residential used on the principal buildings constructed on Site will be a combination of protions of the fullowing: brick, stone, precast stone, precast stone, precast stone, eccentificus fiber board, sto	 three elevations of the proposed building will be articulated with a water table a minimum of three (3) feet in height. f. Building elevations facing existing public street or the new private street shall not have expanses of blank walls greater than 10 feet. g. Architectural features such as, but not limited to, banding, medallions, or design features or materials will be provided to avoid a sterile, unarticulated blank treatment of such walls. h. Roof form and rooffines shall be designed to avoid the appearance of a large monolithic roof structure through the following standards: (i). Long rooffines (pitched or flat) shall avoid continuous expanses without variation by including changes in height and/or roof form (e.g. dormers, gale)e, etc.). (ii). For pitched roofs the allowed minimum pitch shall be 4:12 (four feet in vertical height for every twelve feet in horizontal length), excluding buildings with a flat roof and parapet walls. i. Ground mounted utility structures, such as HVAC units, shall be screened architecturally or with evergreen plant material. j. Retaining walls shall be designed to match and complement the building architecture of the residential buildings of the subject property. k. HVAC and related mechanical equipment will be screened from public view and from view of adjacent properties at grade. 1. Dumpster and recycling area will be enclosed by a solid wall or fence with one side being a decorative gare. The wall or fence used to enclose the dumpster will be architecturally compatible with the building materials and colorous ed on the private) Buildings. The location of the proposed dumpster and recycling area will be enclosed by a solid wall or fence with one side being a decorative gare. The wall or fence used to enclose the dumpster will be architecturally compatible with the building materials and colorous ed on the private) Buildings. The location of the proposed dumpster and recycling area is g

2. Permitted Uses & Development Area Limitation:

Open Space and Amenity Area Improvements:

The Petitioner will construct a pedestrian crosswalk on Private Street A near its intersection with Harrisburg Rd. This pedestrian crosswalk may require signalization (Rapid Rectangular Flashing Beacon -RRFB). The location and design of the crosswalk will be reviewed by CDOT and NCDOT during the permitting process for the Site.

f. The Petitioner will construct two PROWAG compliant ADA curb ramps at the intersection of Robinwood Dr. and the proposed Private Street A as generally depicted on the Rezoning Plan.

g. As part of the constructing of the access to Site from Harrisburg Rd. as the fourth leg of the existing roundabout the Petitioner will retain the two (2) northbound through lanes and add a slip right lane with 100 feet of storage into the development as required by NCDOT.

The Petitioner will work with CDOT and NCDOT to provide a pedestrian crossing on Harrisburg h Rd. as generally depicted on the Rezoning Plan. The construction of the crossing is subject to the approval of CDOT and NCDOT, if approval is not granted the Petitioner will not be required to provide the crossing.

If the Petitioner can provide a pedestrian crossing at the roundabout to allow pedestrians to cross Harrisburg Rd. safely the Petitioner will also explore and use best efforts to extend a sidewalk connection from Harrisburg Rd. to an existing sidewalk in the abutting shopping center. The location of the sidewalk extension to be determined during the permitting process with approvals required by stakeholders, including NCDOT and CDOT. If there is insufficient r/w or the adjoining property owners are unwilling to provide an easement to construct the sidewalk the Petitioner will not be required to make a sidewalk connection.

All transportation improvements shall be constructed and approved prior to the release of the first certificate of occupancy for the Site. The petitioner may phase transportation improvements if said improvements and phasing are explicitly described in site plan notes or agreed to during the land development approval process for the Site. The petitioner may request that CDOT allow a bond to be post for any improvements not completed at the time the first certificate of occupancy is requested and released.

k The location of the proposed intersections and driveway locations are preliminary and may change based on meeting required intersection sight distance when reviewed during the permitting process.

The placement and configuration of the vehicular access point is subject to minor modifications required to accommodate final site development and construction plans and to any adjustments required for approval by the CDOT and NCDOT in accordance with applicable published standards.

m. The alignment of the internal vehicular circulation and driveways may be modified by the Petitioner to accommodate changes in traffic patterns, parking layouts and any adjustments required for approval by CDOT in accordance with published standards.

n. The Petitioner will dedicate and convey to CDOT 50 feet of additional right-of-way from the existing centerline of Harrisburg Road. The additional right-of-way will be dedicated and conveyed prior to the issuance of the first certificate of occupancy.

The Petitioner will dedicate via fee simple conveyance any additional right-of-way indicated on the 0. Rezoning Plan as right-of-way to be dedicated, the additional right-of-way will be dedicated prior to the issuance of the first certificate of occupancy. The Petitioner will provide a permanent sidewalk easement for any of the proposed sidewalks located along the public streets located outside of the right-of-way. The permanent sidewalk easement will be located a minimum of two (2) feet behind the sidewalk where feasible.

All public roadway improvements will be subject to the standards and criteria of CDOT and NCDOT, as applicable, to the roadway improvements within their respective road system authority. It is understood that such improvements may be undertaken by the Petitioner on its own or in conjunction with

CHAR2\2444788v7

also provide a 30-foot access easement to Mecklenburg County for the construction of a trail from Private Street A to the area to be dedicated to Mecklenburg County for a public park. The land to be dedicated and conveyed may not include tree save areas for the remainder of the Site. The dedication and conveyance of the .85 acres and the access easement to Private Street A will occur prior to the issuance of the final certificate of occupancy.

Environmental Features: 8.

The location, size and type of storm water management systems depicted on the Rezoning Plan are a. subject to review and approval as part of the full development plan submittal and are not implicitly approved with this rezoning. Adjustments may be necessary to accommodate actual storm water treatment requirements and natural site discharge points.

Development within the SWIM/PCSO Buffer shall be coordinated with and subject to approval by b. Charlotte-Mecklenburg Storm Water Services and mitigated if required by City ordinance.

The Site will comply with the Tree Ordinance. A survey of trees in the existing street right-of-way с. will be required to be done prior to the first submittal of development plans. Tree save area is not required to be provided for the .85 acres of land to be conveyed to Mecklenburg County for a future park.

d. The Petitioner shall comply with the Charlotte City Council approved and adopted Post Construction Controls Ordinance.

9. Lighting:

All new lighting shall be full cut-off type lighting fixtures excluding lower, decorative lighting that a. may be installed along the driveways, sidewalks, parking areas and courtyards.

Detached lighting on the Site will be limited to 21 feet in height. b.

10. Signs:

a. Reserved.

11. Amendments to the Rezoning Plan:

Future amendments to the Rezoning Plan (which includes these Development Standards) may be a. applied for by the then Owner or Owners of the applicable Development Area portion of the Site affected by such amendment in accordance with the provisions of Chapter 6 of the Ordinance.

12. Binding Effect of the Rezoning Application:

If this Rezoning Petition is approved, all conditions applicable to the development of the Site a. imposed under the Rezoning Plan will, unless amended in the manner provided under the Ordinance, be binding upon and inure to the benefit of the Petitioner and subsequent owners of the Site and their respective heirs, devisees, personal representatives, successors in interest or assigns.
