ZONING COMMITTEE DISCUSSION

Staff provided a summary of the petition and noted that it is consistent with the *2040 Policy Map*. Staff commented that the outstanding item from Mecklenburg County Park and Recreation regarding dedication of land was rescinded due to the petitioner stating it was not feasible and noting constraints due to an existing Norfolk Southern Railroad easement and tree save. Commissioner Winiker inquired about the allowable density for N1-E. Staff responded N1-E zoning district was not translated but may be similar to UR zoning typically permitting between 8-12 units per acre. Commissioner Winiker asked if the site could be developed with single family homes and staff responded single family homes, duplexes, and triplexes are allowable uses. Commissioner Winiker noted the site's proximity to an existing preserve.

Commissioner Welton mentioned receipt of an email from Norma Arnold regarding Beatty Drive and ability to accommodate additional traffic and requested clarity on connectivity policies. CDOT staff responded the project will be required its side of the road, with improvements dependent upon the residential product. CDOT staff noted the type of residential product may also trigger additional improvements, and the project will have to comply with both CDOT and NCDOT requirements. Commissioner Welton also noted a comment in the email regarding improvements to the bridge crossing Catawba River and potential impacts to the surrounding network. There was no further discussion of this petition.

MINORITY OPINION

Commissioner Winiker stated the proposed low density is not consistent with the activity in the area and does not address resource needs in the community.
