Wastewater Enhancement Project

Wastewater Enhancement Project: Surveying in your area

June 5, 2025

Dear Customer:

Charlotte Water (CLTWater) will be in your area to research a new wastewater pipe enhancement project to serve the Ashe Plantation neighborhood and other areas. There is currently a small wastewater treatment plant serving the Duck Creek basin area of Mint Hill. This project will research the possibility of adding wastewater pipe along Fairview Road so that the community's wastewater can be treated at another wastewater treatment plant.

In upcoming weeks, Charlotte Water surveyors may be working on or near your property on one or more occasions. Their activities should not inconvenience you. During this period, it may be necessary for personnel to enter upon your property to conduct surveys or other work related to this project.

If we determine that this project will have any direct impact on your property, we will notify you further as the project progresses.

You may notice pavement markings, wooden survey stakes, plastic flagging or other markings related to these activities. Please do not remove or adjust the stakes or flags.
