- Hillside Drive Construction
- Lorimer Road Work
- Thompson Street Force Main

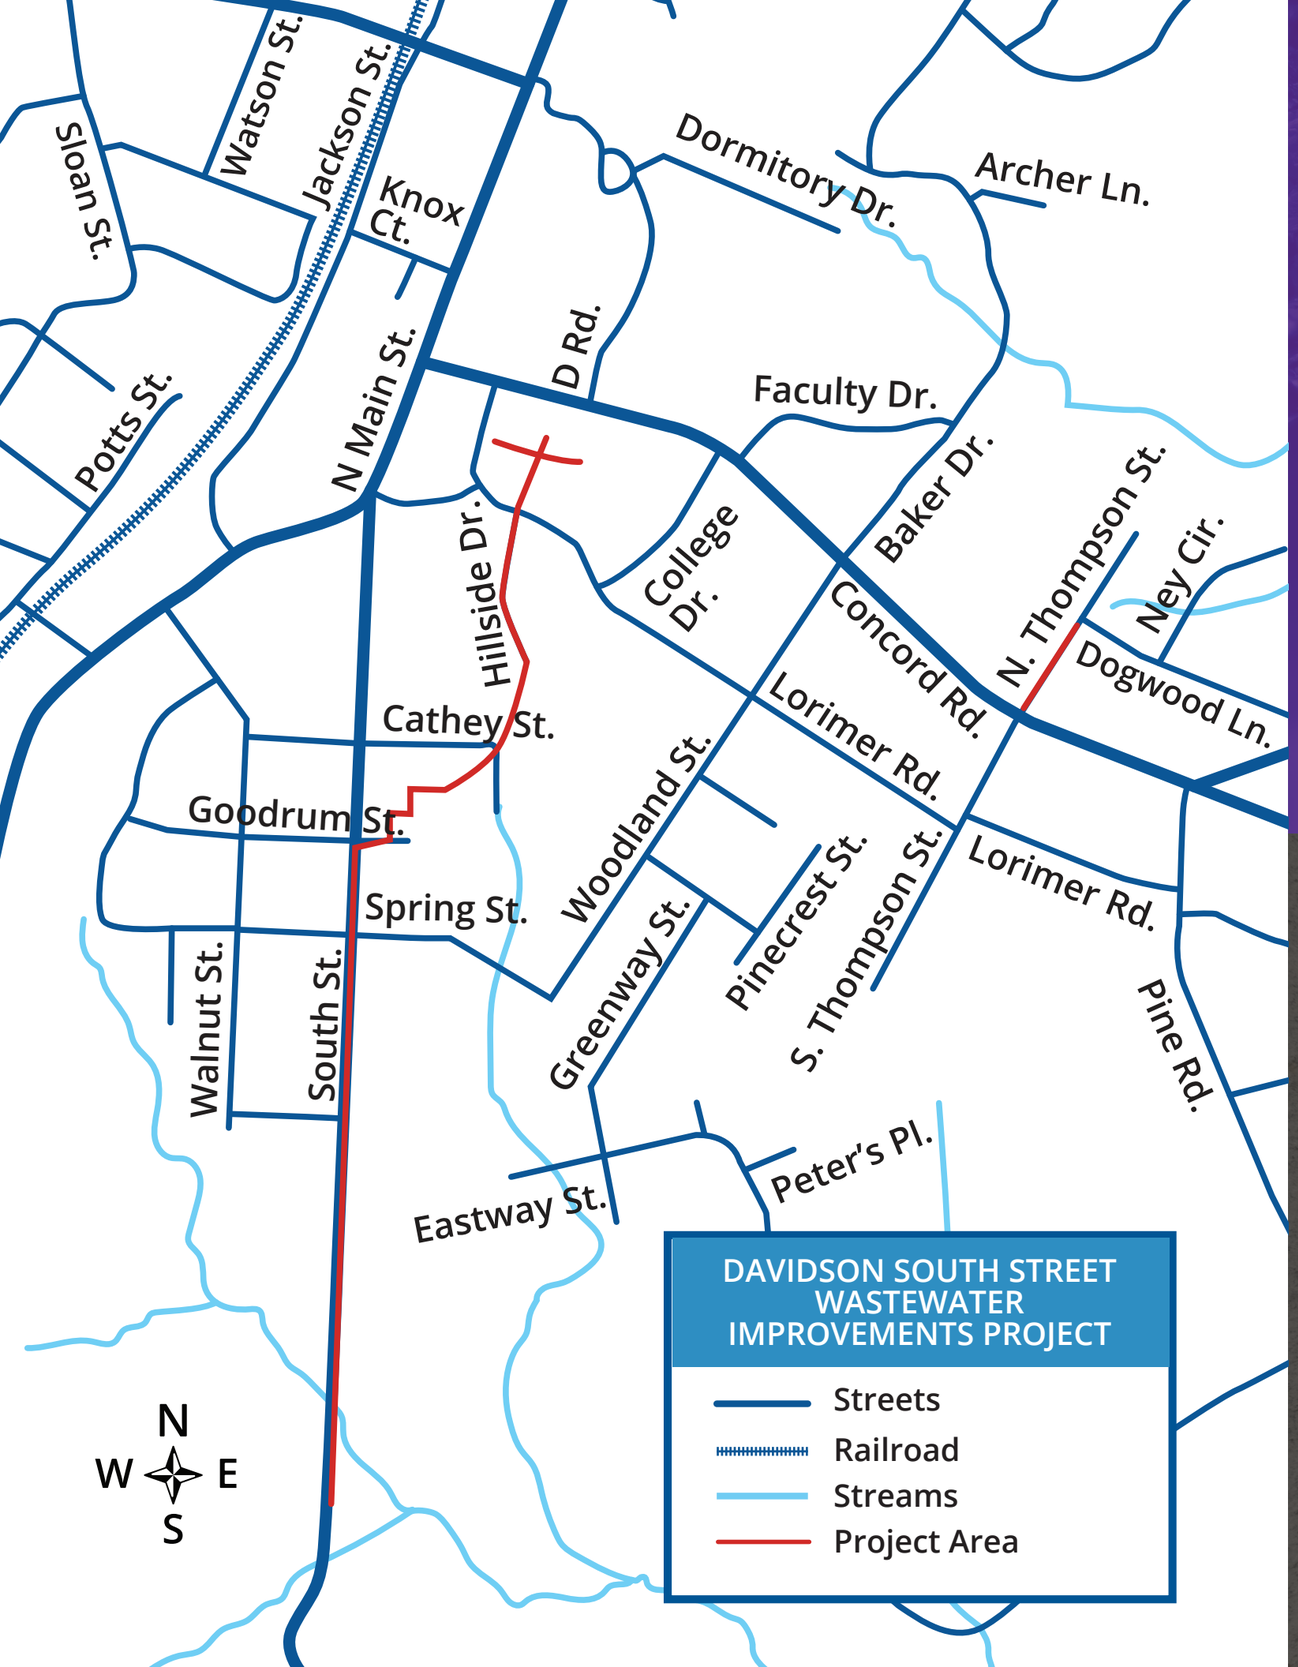
SUMMER 2023

- Clean Up / Restoration Activities

FALL 2023

CONSTRUCTION COMPLETE!

- Detours Removed
- Finishing Touches



CHARLOTTE WATER

DAVIDSON SOUTH STREET WASTEWATER IMPROVEMENTS PROJECT

Charlotte Water (CLTWater) and contractors AECOM (engineering) and Propst (construction) have completed both the design and construction phase of the Davidson South Street Wastewater Improvements Project.

The project area begins on South Street near Davidson Elementary School and ends near the Hillside Drive / Lorimer Road intersection. In addition to the wastewater work, the project team also replaced an aging force main beginning at Concord Road, running north along Thompson Street.

Since Summer 2022, the project team has worked together to install 4,150 feet of pipeline. This project plays a critical role in addressing current and future sewer capacity needs for the area, primarily with the installation of a larger sewer along South Street between Davidson Elementary and Lorimer Road.

PROJECT ACTIVITIES

CONSTRUCTION WORK COMPLETED:

4,150 LF* of Sewer Pipe Installed

29 Manholes Installed (3 Rehabilitated)

200 ft. of Force Main Pipe Replaced (Thompson St.)

200 ft. of Stormwater Pipe Replaced (Lorimer Rd.)

3,500 LF* of Streets Paved

*LF = Linear Foot

FINISHING TOUCHES

In the upcoming months, the team will focus on vegetation and stabilization work to ensure the long-term health of the area. Final pavement markings will also be added to promote safety.

The team will remove silt fencing and inlet protections that were installed during the construction phase.
