# Dixie River Road Water Project Update

Charlotte Water (CLTWater) will extend drinking water pipes along Dixie River Road from the 5900 block of Dixie River Road to Sadler Road.

## What to Expect:

Water pipe construction is scheduled to start November or December 2022. We will provide additional updates before construction begins.

## Interested in Applying for Service?

For eligible properties currently served by a well, property owners can learn more about purchasing a public water connection, by going to [www.charlottewater.org](http://www.charlottewater.org) (Development & Connections, New Connections Residential). Email [CLTWaterNewServices@charlottenc.gov](mailto:CLTWaterNewServices@charlottenc.gov) or call 704-432-2854 to check availability before applying.

There is a 10% price reduction on the connection fee for applications submitted and approved before the completion of construction. You can view our water rates at [www.charlottewater.org](http://www.charlottewater.org) (Development & Connections, Service Connections, Residential). Applicants must pay the connection and system development fees based on the meter size. CLTWater funds the pipe extension to the applicant's property and the applicant pays for the physical connection at the property. The applicant's connection and system development fees are often less than ten percent (10%) of the total investment to extend pipes to serve a property.

Learn more about the projects at [www.charlottewater.org](http://www.charlottewater.org) (click on "projects" drop down, then construction, and select Dixie Berryhill Drinking Water Project).

Major updates will also be emailed via Nextdoor.

The easement and temporary construction easement will be cleared of trees (with some exceptions) and restored to grass after pipe installation. CLTWater will preserve trees if possible.
