Construction is Coming To Your Area Soon

Little Hope Creek Phase 2

Wastewater
Improvement Project

FEBRUARY 2022

Little Hope Creek Wastewater Improvement Project

Phase 2 Construction

WHAT: Contractors for Charlotte Water, led by Park Construction, will begin construction on Phase 2 of the Little Hope Creek Wastewater Improvement project. Once completed, the project will enhance the wastewater system in the community and protect the water quality in the creek.

WHEN: Phase 2 construction is expected to begin March 2022. Residents will see varying levels of activity as crews make their way up the alignment.

WHERE: Crews will start at Seneca Place and follow north along Little Hope Creek to the intersection of Hartford Avenue and Belton Street (see map).

WHAT TO EXPECT:

Clearing – Crews will clear trees, bushes, shrubs, fences and other structures within the easements following Little Hope Creek.

Moving equipment on site – Crews will move construction equipment and materials to easements along the project site throughout construction.

Materials delivery and staging – Pipe and concrete manhole structures are delivered and staged within the construction easements.

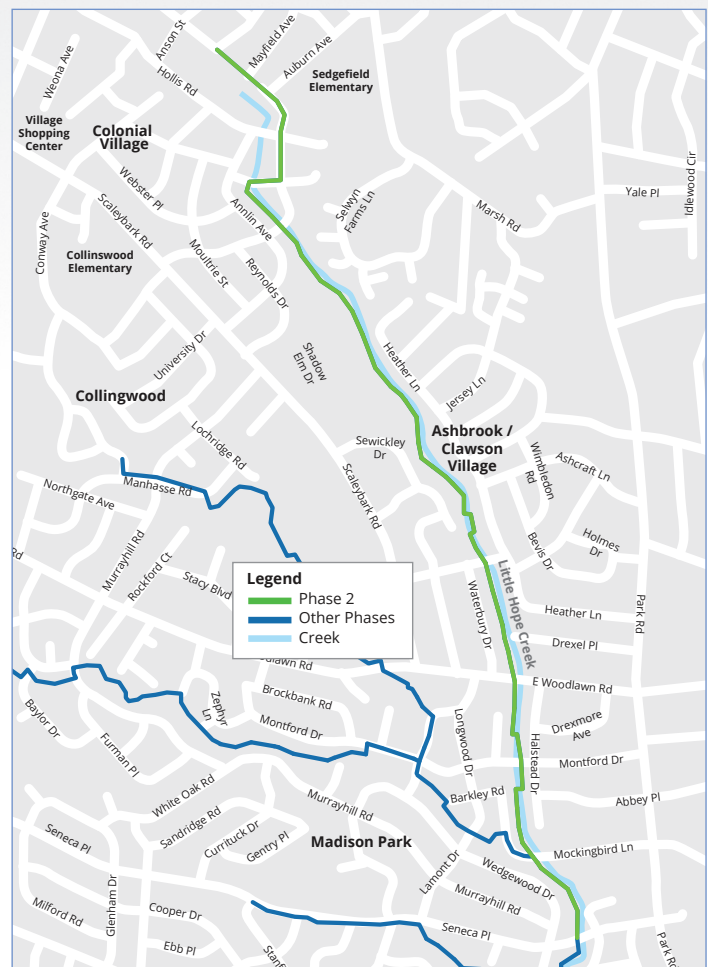

Establishing a safe work zone – Fencing will be installed around work areas and pipe will be stabilized.

Trench digging, placing pipe and backfilling

Customers may feel a rumble – Crews may remove underground rock formations by use of controlled blasting. Pre-blast surveys are conducted as requested by property owners within the designated areas of the blasting sites. Blasting is a standard construction procedure in which holes are drilled into the rock for dynamite placement and covered with packed dirt or heavy mats. A seismograph monitor records blast vibrations to verify they are within specifications. All safety precautions will be taken. Customers may hear a warning horn, a muffled noise, and slight vibration or rumble similar to a slammed door or thunder.

Construction traffic – Dump trucks will travel along the alignment, within the easements and roadway.

Lane closures and detours around work – Motorists should follow all traffic control signs and measures.

NEXT STEPS: Phase 2 construction is expected to take approximately 24 months to complete (schedules are subject to change, due to weather and other conditions). Residents will continue to receive notifications throughout the duration of the project regarding project activities and progress.

QUESTIONS: For updates on project progress, please visit the project website at bit.ly/LittleHopeCreek or by visiting charlottenc.gov/littlehopecreek. Additionally, we are now offering text alert notifications (see other side for details). If you have a question, please contact project manager Stephen Scott, (980) 219-9488 or Stephen.Scott@charlottenc.gov.
