

# LITTLE HOPE CREEK

Fall 2023

A NEWSLETTER ABOUT THE LITTLE HOPE CREEK WASTEWATER IMPROVEMENT PROJECT

## Progress Continues on Little Hope Creek Wastewater Improvements

Charlotte Water and its contractors continue to make progress on wastewater improvements in the area. The project will enhance the wastewater system in the community, by repairing and replacing portions of the system and increasing the capacity. Once complete, the project will reduce the risk for sewer overflows and protect the water quality in the creek.

### Project Progress and Look Ahead

#### Phase 1:

Pipe installation and restoration activities are complete.

#### Phase 2:

Construction was completed in August 2023 with restoration activities near completion. At the end of October, crews completed the reseeding process for portions along the alignment.

#### Phase 3:

Clearing activities for phase 3a South of Woodlawn Road are slated to begin in November, with construction and pipe laying activities to follow in December 2023. Properties along the route that will be impacted by construction have been, or will be, contacted directly regarding upcoming activities.

A NEWSLETTER ABOUT THE LITTLE HOPE CREEK WASTEWATER IMPROVEMENT PROJECT

## Activities to Expect

### Field Work Activities to Expect

**CCTV** – Crews use a camera to inspect the inside of existing pipeline and verify connections.

**Surveying** – Charlotte Water and subcontractors may walk the alignment. Crews may place survey stakes/ flags and paint markings on the ground. We ask that residents do not remove the survey stakes and flags as they are critical to completing the design of this project.

**Pre-blast survey** – Residents along the phase 3a alignment can expect to receive an invitation for a preblast survey if they are within the vicinity of the project alignment.

**Easement acquisitions** – Impacted properties will be contacted by real estate representatives with Gulf Coast, LLC.

### Construction Activities to Expect

**Clearing** – Crews will clear trees, bushes, shrubs, fences and other structures within the easements following the project alignment.

**Moving equipment on site** – Crews will move construction equipment and materials to easements along the project site throughout construction.

**Materials delivery and storage** – Pipe and concrete manhole structures are delivered and stored within the construction easements.

**Establishing a safe work zone** – Fencing will be installed around work areas.

### Trench digging, placing pipe and backfilling

**Construction traffic** – Dump trucks will travel along the alignment, within the easements and roadway.

**QUESTIONS:** For updates on project progress, please visit the project website at [bit.ly/LittleHopeCreek](http://bit.ly/LittleHopeCreek). If you have a question, please contact project manager Will Rice, (704) 578-9734 or [WRice@charlottenc.gov](mailto:WRice@charlottenc.gov).
