

# Kenilworth/Romany

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services held a third public meeting on October 21 at Dilworth United Methodist Church to kick-off the real estate phase and begin easement acquisition for the Kenilworth/Romany Storm Drainage Improvement Project.

Meeting highlights:

- Project Manager Chad Nussman introduced the project team, summarized the history of the project and discussed the project phases including the current design phase.
- Mr. Nussman summarized the scope of the improvements, identifying storm drains on a map as either new or needing to be upsized.
- David Baker (City Senior Engineer) presented the proposed work on Lyndhurst Avenue, which is a resident-

driven project separate from the Kenilworth/Romany project. Mr. Baker said the 95% design plans are currently in review and construction could begin in approximately 6 to 8 months. Mr. Baker explained the purpose of the work is to construct inlets along Lyndhurst Avenue between E. Kingston Avenue and East Boulevard to help drain the flat road during storm events.

- A question/answer session was held.

For more information or detailed meeting minutes, visit our website at [stormwater.charmeck.org](http://stormwater.charmeck.org). Click on the **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Kenilworth/Romany**.
