

Valleybrook

Storm Drainage Improvement Project

— Revised Project Area — Original Project Area

PROJECT STATUS
MARCH 2024

PROJECT STATUS | MARCH 2024

Charlotte-Mecklenburg Storm Water Services would like to thank residents who provided feedback during the planning phase of the Valleybrook Storm Drainage Improvement Project.

The project team has evaluated multiple storm drainage improvement alternatives and will not be moving forward at this time with proposed improvements along Valleybrook Road.

Improvements will be limited to north of Sardis Lane. The project team will communicate directly with affected property owners within the revised project area as the design phase begins.
