

Underground Electric Service Installation

***New Site:** Typical completed underground installation.*

Standard equipment used for underground installations.

***Existing Home Site:** Typical completed underground installation in established yard.*

- Schedule landscaping **after** the electric service has been installed.
- Locate or expose all underground lines or tanks (septic, water, oil, etc.) **before** scheduling your service installation.
- Apply for electric service **as early as possible** to avoid service delays.

* **NOTE:** Overhead service is another option available where overhead facilities exist.

Service application can be made at www.duke-energy.com or by phone at 1-800-777-9898.
