Thank you for signing up to learn more about this project. This newsletter will serve as a resource for project details, relevant stories, and ways to stay engaged. Check out the information below and stay tuned for more.

Project Updates

SEAP+ Advisory Committee Application Now Open

We are excited to share a great opportunity to get involved with the SEAP+ Advisory Committee, or SEA-AC+. This committee will be composed of passionate community members, residents, and subject matter experts to help guide the city's climate and energy goals.

The committee's purpose is to provide community-informed perspective and inspire residents to all work together to implement the SEAP+ and achieve our citywide goals. This is a chance to help implement actions in the SEAP+ focus areas of buildings, energy generation transportation, waste reduction and others— and help make a real impact.

The SEA-AC+ will hold quarterly meetings and each member will participate in a subgroup focused on one of these areas. If you have expertise or a strong interest in civic advocacy, sustainability or environmental issues, this could be the perfect fit for you.

What is the SEAP + Advisory Committee (SEA-AC+)

The SEA-AC+ (see - act) is the Strategic Energy Action Plan Plus (SEAP+) Advisory Committee, composed of volunteers representing environmental, residential, business and other interests that correspond to the SEAP+ focus areas: Building, Energy Generation, Transportation and Cross Sectional.

Purpose

The purpose of the SEA-AC+ is to provide community-informed guidance and support in the implementation and advancement of the SEAP+, with specific focus on the communitywide goals. This committee will serve as a collaborative forum for residents, stakeholders and subject matter experts to share insights, identify opportunities and inspire actions that the community can take to achieve its goals through the different focus areas — Building, Energy Generation, Transportation and Cross Sectional. While there may be opportunities to provide input on city-specific initiatives, the main focus of this committee will be to determine and share ways to facilitate SEAP+ in the community.
